

Control heating and cooling comfort where you want it, when you want it. With a Honeywell Zoning System, you won't be heating empty rooms or over-cooling one area in order to cool another. Zoning is a comfortable, energy-efficient way to enjoy the temperature you want in every room. Think of it as controlling your heating and cooling the same way you control your lights.

Comfort When You Want It, Where You Want It.

Every home has at least two zones —

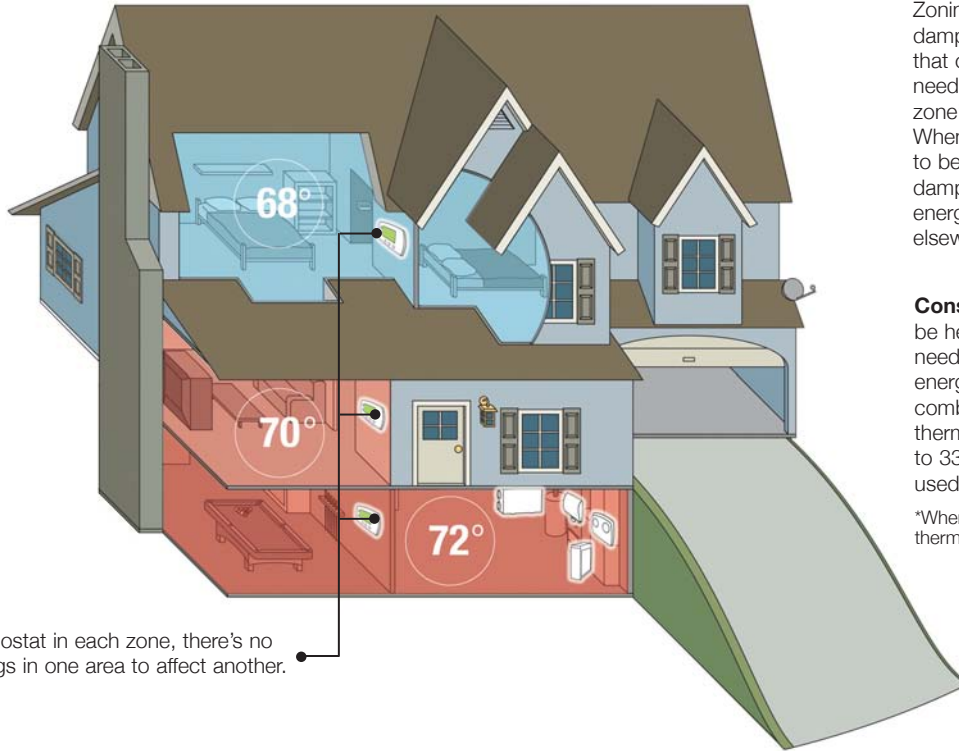

The living area and the sleeping area, which are rarely used at the same time. Then, there is upstairs and downstairs, rooms that are used a lot (family rooms), and rooms that may not be used often (formal dining rooms). And, of course, someone in the family likes it warm while someone else likes it cool. Zoning makes it possible for everyone to be comfortable.

Comfort — Eliminate rooms that are too hot or too cold.

5-Year Warranty

Convenience —

With the flexibility of a thermostat in each zone, there's no more cranking up the settings in one area to affect another.

Efficient — No need for a heating and cooling system for every room. Honeywell Zoning Systems use dampers in your ductwork that open and close as needed based on each zone's thermostat settings. When a zone doesn't need to be heated or cooled, the dampers close to save energy and maximize comfort elsewhere. It's that simple.

Conservation — You'll only be heating/cooling areas as needed, so you'll be saving energy. In fact, when combined with programmable thermostats, you can save up to 33% off your energy bills if used as directed*.

*When compared to a central thermostat, no setback

Zoning Savings Can Quickly Add Up*

ANNUAL FUEL COST	SAVINGS IN 1 YEAR	5 YEARS	10 YEARS
\$1000	\$300	\$1500	\$3000
\$1250	\$375	\$1875	\$3750
\$1500	\$450	\$2250	\$4500
\$2000	\$600	\$3000	\$6000

* When used with programmable thermostats.

Ask your HVAC contractor which Honeywell Zoning System is right for you.
