Example: Annual cooling cost to run a 3-ton (36,000 BTU/Hour) produced in the 1990s with a 10 SEER will be \$1,210. If replaced with a new 15 SEER system, the cost drops to \$810 - a savings of \$400 per year.
 Costs based on 2,800 annual cooling hours and 12 cents per kWh (average for South Florida)
